

# PAVEMENT PRESERVATION Workshop

Tuesday, April 24, 2018

8:30 AM - 2:00 PM

Whispering Pines Conference Center at Alton Jones,  
401 Victory Hwy, West Greenwich, RI

### Areas of Discussion

Applying a pavement preservation treatment at the right time, on the right project, with quality materials and construction is a critical investment strategy for optimizing infrastructure performance. At this workshop we will discuss the when, where and how of pavement preservation.

### Facilitators

Lunch buffet will be served

## Pavement Preservation Training

RSVP by April 10, 2018

Name: \_\_\_\_\_ Title: \_\_\_\_\_

Agency: \_\_\_\_\_

Phone #: \_\_\_\_\_ Email: \_\_\_\_\_

Food Allergies? Please let us know \_\_\_\_\_

To Register: fill out this form and mail to: RIPWA, 20 Burlingame Drive, Charlestown, RI 02813  
or e-mail all information to: erin@ripwa.org

## Pavement Preservation Workshop

Education is an integral part of any Pavement Preservation Program. Preservation practices are constantly evolving as new techniques and products are developed.

Whether a highway pavement is constructed using asphalt, concrete or a composite system, traffic loads and environmental elements will contribute to its deterioration over time. Pavement preservation treatments can slow this structural decline. When the right treatment is applied at the right time with quality materials and construction, these practices offer a proven, cost-effective approach to extending the overall service life of pavements and achieving smoother, safer roads with fewer costly repairs.

### What is preservation?

Preservation includes work that is planned and performed to improve or sustain the condition of the transportation facility in a state of good repair. Preservation activities generally do not add capacity or structural value, but do restore the transportation facility's overall condition.
